Hello Besty:

I called (734-770-8042) to respond to your inquiry, however the voicemail did not identify a person, therefore I didn't leave a message as I thought I might have reached an incorrect number.

I found your email on the EPA website and figured I could at least respond via this method.

To your question, you were looking for somewhere near Michigan to dispose of Aluminum Dross. First to mention, just so you're aware, Alcoa does not typically "dispose" of Dross, but rather has it recycled. There are several Dross recycling facilities throughout the US that can potentially be utilized, but there are a few facilities in and around MI that you might want to contact. Below is there information:

Aleris - Coldwater	Coldwater	MI	USA	(517) 279-1000
Aleris - Chicago Heights	Chicago Heights	IL	USA	(708) 758-8888
Scepter - Bicknell	Bicknell	IN	USA	(812) 735-2500

Hope this helps, and if we can be of further assistance, please don't hesitate to contact us.

Have a nice weekend,

JRM

John, I've just forwarded you a call received on the Request Line that Jim said you would handle – someone from the EPA in Michigan wants to dispose of aluminum dross but is having a hard time finding a facility that will take it. Thanks.
